DETAILED ACTION

1. This Office Action is the answer to the Amendment filed on August 30, 2002, which paper has been placed of record in the file.
2. Claims 33-118 are added. Claims 1-118 are pending in this application.

Restriction/Election

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-46, 61-74, 89-102, 117, and 118, drawn to a method for processing checks at a remote location, classified in class 705, subclass 16.
 - II. Claims 47-60, 75-88, and 103-116, drawn to a method for processing checks at a central site, classified in class 705, subclass 42.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d). In the instant case, invention has separate utility such as:

Inventions I and II have separate utility such as: the invention I drawn to a method for processing checks at a remote location, in contrast, the invention II drawn to a method for processing checks at a central site. Therefore, the invention I and II are shown to be separately usable.

Art Unit: 3628

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
